OBJECTIVE

Dynamic Web Developer with 6+ years of experience specializing in PHP, JavaScript, and SQL, with deep expertise in Laravel, NestJS, and NuxtJS. Proven track record in building scalable, responsive, and high-performance web applications. Adept at leveraging AI-driven development tools to accelerate delivery cycles, optimize code quality, and drive technical innovation. Committed to delivering efficient, future-proof web solutions that prioritize exceptional user experience.

WORK EXPERIENCE

PT Kode Kolektif Indonesia | Senior Fullstack Web Developer | Permanent Employee

Yogyakarta | December 2024 - Present

- Developed a web-based Cryptocurrency Payment Gateway system targeting users across various Asia-Pacific countries using NestJS and VueJs technologies.
- Integrated automated withdrawal and blockchain verification processes.
- Built a web-based Accounting Application using Java Spring Boot and Vue JS.
- Built a centralized CRM system using Laravel to optimize sales pipelines, lead tracking, and performance analytics, resulting in improved coordination within the Sales Department.
- Designed and developed a Project Management Office (PMO) application using Laravel with a focus on intuitive UX. Simplified complex task hierarchies and integrated a robust user activity tracking system to enhance team productivity.

PT Infimedia Solusi Pratama | Fullstack Web Developer | Contract Employee

South Jakarta | February 2023 - November 2024

- Developed a web-based asset management application for an energy company in North Sumatra, using the Laravel framework for the backend and Vuejs for the frontend.
- Created a database mirroring mechanism from an Informix database to an SQL Server database using stored procedures.
- Built a web-based application for managing hazardous (B3) and non-hazardous waste for a private mining company in North Sumatra.
- Served as a Business Analyst for an HRIS application at a private gold mining company in North Sumatra.
- Developed an automation system for shift assignments, leave balance distribution, and final report generation for the HRIS at the private gold mining company in North Sumatra.

CV Griya Sarana Informatika | DB Admin & Web Developer | Permanent Employee

Cirebon | January 2020 - January 2023

- Developed a Point of Sales Trading Manager Application used by over 100 stores across West Java.
 - The application assists retail stores in managing their sales and purchasing activities.
 - Developed an IoT-based Badminton Court Management system using Arduino for automated court lighting.
 - Developed a Pharmacy Management Application used by more than 20 pharmacies in the Cirebon region.
 - Developed a Car Rental Application and created custom reports using Fast Report based on the specific needs of each store.
-
